# *Public Libraries*

---

Public library services in Wisconsin are primarily provided by local units of government such as municipalities and counties, although the state plays a major role in ensuring coordination and resource sharing among libraries. The Department of Public Instruction (DPI), through its Division for Libraries, Technology and Community Learning, is responsible for statewide library development, resource sharing and administering state aid to public library systems, which are organizations that coordinate library development and resource sharing among libraries in a specific geographic region.

This paper provides information on library services, with a special emphasis on public library systems. The first section describes how library services are organized and administered. The second section discusses how public libraries are financed. The final section examines the formula used to distribute state aid to public library systems. This paper does not address libraries in elementary and secondary schools or institutions of higher education.

---

## **Organization and Administration**

---

### **Municipal and County Libraries**

Local governments plan for and provide library services. Currently, such services are provided by: (a) municipal libraries; (b) joint libraries, which are libraries operated by two or more municipalities or

a county and one or more municipalities; (c) consolidated county libraries; or (d) county library services, which are library services provided by the county or under contract. There are currently 389 municipal and county library service organizations. County governments may contract for access to public libraries by residents who live outside the primary service jurisdiction of a public library organization. In 2001, counties extended library services to 1,474,000 people in this manner.

By statute, countywide library services can be provided on a consolidated basis, where each library in the county is a branch of a main county library. Counties organized in this manner have one countywide library board, which governs all libraries. There are currently seven consolidated county libraries, including: Adams, Brown, Florence, Marathon, Marinette, Menominee, and Portage Counties. By contrast, in other counties, libraries are not branches of a main county library but are independent, each with its own governing board. Although they are self-governing, libraries in other counties do coordinate borrowing and sharing of resources. County residents may borrow materials from any library in the county.

Most library services are provided by municipal libraries, which are governed by local library boards and receive funding from municipal governments. Local services may also be provided through contracts between municipal libraries and other library organizations. Where there are no municipal libraries, county governments provide library services or contract for such services.

## Library Systems

Public library systems were created by the Legislature in 1971 to improve and extend public library services, promote resource sharing among libraries, and increase access to library materials and services by the state's residents. Serving a specific geographic region, each system provides special services and programs not offered by municipal and county libraries. Library systems receive state aids for coordination and supplementation of services beyond what could be provided by local and county funds.

The first four public library systems in Wisconsin began operating in 1973. Currently, there are 17 library systems serving all 72 counties and every state resident. These systems are shown in Appendix 1. Library systems do not oversee the administration of local libraries, which remain autonomous in regard to local services and operations. Although not required to do so, all local units of government that provide library services participate in a library system.

Library systems may be organized on a single-county or multi-county basis. The territory within the system must serve a population of at least 100,000. If due to the withdrawal or realignment of participating municipalities or counties, a system has a population under 100,000, the remaining system members must realign with an existing system within two years from the date of the decrease in population. Further, no new system may be established unless it serves a population of at least 200,000.

Single-county consolidated systems have seven or nine board members appointed by the county board. Single-county federated systems have governing boards consisting of seven members. Members are nominated by the county executive or by the county chairperson in a county without a county executive and approved by the county board.

Multi-county systems must be federated systems, which are systems made up of multiple independent libraries that are not branches of a centralized library. A multi-county system is considered a joint agency of all participating counties but constitutes a separate legal entity for purposes of having exclusive custody and control of all system funds, holding title to and disposing of property, constructing, enlarging and improving buildings, making contracts and suing and being sued. Single-county systems, which may be consolidated or federated, are considered a county agency. A federated public library system located within a single county with a population of 500,000 or more constitutes a separate legal entity solely for the purposes of having custody and control of all system funds, making contracts and providing employee benefits.

In multi-county federated systems, governing boards have 15 to 20 members. The members are nominated by the county executive in each county in the system or by the county board chairperson in each county without a county executive and approved by each county board in the system. Members are appointed in proportion to population distribution with at least one system board member from each county. The system board membership may exceed 20 if the county boards, acting jointly, decide that at least two members on the board shall represent each county in the system. All system board members serve staggered, three-year terms.

In order for counties and municipalities to participate in library systems, they must meet specific statutory requirements. Each county within a system is required to maintain its financial support for library services at a level not lower than the average of the previous three years. In addition, counties participating in federated systems must maintain a plan of library service. The plan must provide for services, including full access to libraries, to county residents living outside municipalities with library services and provide for reimbursement of public libraries for

access by residents of those municipalities.

A municipal, county or joint library may participate in a system if it: (a) is located in a county that participates in a public library system; (b) is authorized by its municipal governing body or county board to participate in the system; (c) participates in system activities; (d) employs a DPI-certified head librarian; and (e) is funded by the municipal or county governing body at a level not lower than the average of the previous three years.

In order to facilitate state residents' access to library services, all public libraries are required to honor valid borrowers' cards from libraries in adjacent systems (with the exception of the Milwaukee County Federated Library System). However, a public library may refuse to provide services to residents of adjacent systems if the total amount of the reimbursement received by the library for the preceding year from the adjacent system, and from counties and municipalities in that system, is less than the cost incurred by the public library in providing the service. The first 500 loans are not included in the cost calculation. Should a library refuse to honor the valid cards of borrowers from an adjacent system, annual meetings between representatives of the systems involved must be held to discuss the resulting lack of services and the cost of providing such services.

In an effort to enhance the research and reference capacity of member libraries, each system must contract with the member library with the largest annual operating budget to serve as the system resource library. The resource library must have a collection of at least 100,000 volumes, be open to the public at least 50 hours each week and employ at least one permanent reference librarian with a master's degree in library science. If no library in the system meets these requirements, systems must enter into a supplementary contract with an academic library in the system or a resource library in an adjacent system.

## **Division for Libraries, Technology and Community Learning**

The statutory duties of the Division for Libraries, Technology and Community Learning are to: (a) provide continuing education programs for librarians; (b) provide assistance to libraries in personnel recruiting; (c) provide professional and technical services; (d) prepare statistical reports on statewide library service; (e) designate a librarian to coordinate the activities of state depository libraries; (f) establish library standards; (g) certify public librarians; (h) approve the establishment of library systems; (i) provide reference and loan services to supplement those of other types of libraries in the state; (j) implement programs and policies as directed by the State Superintendent; (k) distribute state library aids; and (l) assist the Council on Library and Network Development in the preparation of Council reports. In addition, 1997 Act 150 added the requirements that the Division: (a) review a system if at least 30% of the libraries in participating municipalities, which include at least 30% of the population of all participating municipalities, state that the public library system did not adequately meet the needs of libraries participating in the system; and (b) prepare an advisory plan for such a library system suggesting how the system can adequately meet the needs of its participating libraries, if the Division determines that the public library system previously failed to do so. While the Division also has additional duties unrelated to library services, currently there are a total of 38.96 FTE positions that are directly responsible for library services.

The statutory duties of the State Superintendent related to libraries are to: (a) assist development of school library services; (b) ensure public libraries serve all state citizens; (c) promote resource sharing among libraries and related agencies; (d) coordinate library services for institutional residents, the physically and mentally handicapped, the socio-economically disadvantaged, and racial and ethnic minorities; (e) act as agent of receipt for federal library grants; (f) contract for the provision of library

services to the blind and physically handicapped and other specialized library materials; and (g) maintain a statewide library holdings database.

In order to fulfill several of these requirements, the Division contracts with four entities that provide specialized library services statewide. First, the Cooperative Children’s Book Center, housed in the University of Wisconsin-Madison School of Education, obtains and reviews children’s publications and provides an opportunity for school and public librarians to review these materials prior to purchasing them. Second, as statutorily required, the Regional Library for the Blind and Physically Handicapped, housed in the Milwaukee Public Library, provides a collection of specialized materials such as large-print and braille books. Third, the Wisconsin Interlibrary Loan Service (WILS) is a nonprofit organization that provides automated library services, primarily an on-line nationwide cataloging service, to public and school libraries. Fourth, the Division contracts with the Milwaukee Public Library to provide statewide interlibrary loan of its collection.

According to statute, the Division must also operate the State Reference and Loan Library, located in Madison, which acts as a clearinghouse for interlibrary loan requests forwarded from other libraries, locating the requested materials in libraries throughout Wisconsin or in other states. The Library also supplements the collections and resources of all types of libraries in the state by maintaining its own collection of specialized and unique materials and providing reference assistance to patrons and librarians statewide on questions that require sophisticated research techniques and reference sources.

---

## Financing

---

Table 1 shows operating income that was reported for calendar year 2001 by public libraries

**Table 1: 2001 Operating Income for Public Library Services**

	Amount (In Millions)	Percent
Municipal funds	\$114.3	59.5%
County funds	39.5	20.6
State aid to public library systems	14.7	7.7
Federal grants	1.5	0.8
Contract income	0.9	0.5
Endowments, gifts and other income	<u>21.0</u>	<u>10.9</u>
<b>TOTAL</b>	<b>\$191.9</b>	<b>100.0%</b>

and library systems in the state.

**Municipal funds** support the costs of providing basic library services at a municipal library to residents who pay taxes for library services. These funds are generally used for construction and maintenance of facilities, personnel, purchase of materials of all kinds, and support of circulation, reference, and other programming as determined by a locally-appointed library board.

A county board may provide funds to individual municipal libraries or to public library systems. **County funds** are most commonly used to provide library service or access to it for county residents not residing in a municipality that operates its own library. Counties often reimburse existing libraries for use by nonresidents or they may directly provide bookmobile service, books-by-mail service, or any other service as determined by the county library board or county board.

While the statutes define a clear role for counties with respect to organizing and establishing a system, and require that counties support library services financially, prior to 1997 Act 150, the statutes did not stipulate the level of support that counties must provide to libraries (beyond the maintenance of effort provision). Prior

to 1997 Act 150, in about three-fourths of the systems, member counties paid the system directly to distribute funding among the county and municipal libraries within the system. The budgets of these systems included both county and state funds. In the other systems, member counties generally chose to distribute funding directly to municipal libraries in the county or to provide services themselves through a county library. The budgets of these systems consisted primarily of state aid and did not include county funds.

Act 150 created the provision that beginning in 2001, each county (except Milwaukee County) is required to make payments to each public library in the county, if the county does not maintain a consolidated public library for the county and contains residents of municipalities that do not maintain a municipal or joint library. The payments must be made by March 1 of each year, and must equal at least 70% of the amount of the cost of providing loans to those county residents, computed as follows: (a) divide the total operational expenditures of the library during the calendar year for which the loans are reported, not including capital expenditures or expenditure of federal funds, by the total number of loans made by the public library during the calendar year for which the loans are reported; and (b) multiply the result by the number of loans, in the calendar year loans are reported, made to residents of the county who are not residents of a municipality that maintain a municipal or joint library. The Act states that a county may voluntarily provide aid to public libraries in excess of the amount required by statute.

By July 1 of each year, each public library lying in whole or in part in a county must report to the county clerk on the following: (a) the number of loans of material made by the library during the prior calendar year to residents of the county who are not residents of a municipality that maintains a municipal or joint library; and (b) the total number

of loans of material made by the library during the previous calendar year.

The 1997 Act 150 provision relating to county payments for library services first applied to county payments made by March 1, 2001, for services reported to the county clerk by July 1, 2000, and provided in the 1999 calendar year.

**State funds**, which are provided with general purpose revenues (GPR), go directly to public library systems and are intended to fund system services required by statute. Such services include interlibrary loan, reference referral, consulting, continuing education, services to users with special needs, resource library services, collection development, and multi-type library cooperation. However, there is no requirement that state aid be used exclusively for statutorily required services. System boards have the authority to develop programs that meet area needs and to support these programs with state funds.

**Federal grants** are used for a variety of purposes including automation and internet access, collection development, literacy services to special user groups such as senior citizens or Native Americans, the purchase of special equipment and cooperative projects.

**Other income** includes state service contracts with Milwaukee Public Library, gifts, state and local carryover funds and all other sources of income not identified above.

Library systems rely primarily on state aid and county funds. Systems also receive funding from federal grants, contract income and other sources such as interest earnings, gifts, grants and endowment income. Contract monies are most often paid by other systems or the counties for providing services such as access to library services. Funding for Wisconsin's 17 library systems, which operate on a calendar year basis, is summarized in Table 2 for calendar year 2001.

**Table 2: Library System Funding (Calendar Year 2001)**

System	County	State Aid*	Federal Aid	Contract Income	Other Income	Total Income

---

## State Aid to Library Systems

---

### Service Requirements

In order to be eligible for state aid, public library systems are required to meet the following service standards:

1. Agree to provide access by any resident of the system area to the library services of any participating library on the same terms that they are provided to the residents of the municipality or county that established the library and to provide interlibrary loans among all participating libraries;

2. Backup reference, information and interlibrary loan services from the system-designated resource library;

3. Referral or routing of reference and interlibrary loan requests from libraries within the system to libraries within and outside the system;

4. In-service training for participating library personnel and trustees;

5. Electronic delivery of information and physical delivery of library materials to participating libraries;

6. Service agreements with all adjacent library systems;

7. Professional consultant services to participating public libraries;

8. Service programs designed to meet the needs of participating public libraries and the residents of the system area, as determined by the system board after consultation with participating libraries;

9. Promote and facilitate the use of library services to users with special needs;

10. Cooperation and continuous planning with other types of libraries in the system area, such as college, university and private facilities;

11. Planning with the Division for Libraries, Technology and Community Learning, participating public libraries and other types of libraries in the area in regards to library technology and the sharing of resources.

In addition, if a system reimburses participating public libraries for the cost of providing interlibrary borrowing services, the reimbursement cannot exceed the actual costs to that library, as determined under DPI administrative rules.

The specific services each system provides are based on particular system-wide needs and therefore, vary between systems.

**State Aid Formula**

The formula that determines amount of state aid paid to each library system was changed in 1999 Act 9. Under Act 9, aid is determined as follows: (a) determine the percentage change in the total amount appropriated for public libraries between the previous fiscal year and the current fiscal year; (b) multiply the amount of state aid received by the system in the previous fiscal year by the sum of 1.0 and the result of (a).

The formula will change again, however, beginning in the fiscal year in which the total state aid appropriation equals at least 11.25% of the total operating expenditures for public libraries from local and county sources in the previous calendar year. Appendix 2 presents a sample aid calculation for this pending formula.

Table 3 shows the 2002-03 state aid payments (payable for calendar year 2003 operations based on the percentage change in the appropriation from 2001-02 to 2002-03) for each of the 17 public library systems, as well as the factor used in calculating these entitlements.

Total state aid for library systems decreased from 2001-02 to 2002-03. Appendix 1 lists the member counties for each of the library systems.

**Table 3: State Aid to Public Library Systems (Fiscal Years 2001-02 and 2002-03)**

System	2001-02 State Aid	Appropriation Factor	2002-03 State Aid
Arrowhead Library (1)	\$430,913	0.962501	\$414,754
Eastern Shores (2)	568,398		547,084
Indianhead (10)	1,105,382	(same	1,063,932
Kenosha County (1)	391,685	factor for	376,997
Lakeshores (2)	626,531	all systems)	603,037
Manitowoc-Calumet (2)	306,639		295,140
Mid-Wisconsin (3)	741,190		713,396
Milwaukee (1)	2,630,055		2,531,431
Nicolet (8)	1,050,657		1,011,259
Northern Waters (8)	519,826		500,333
Outagamie-Waupaca (2)	596,859		574,478
South Central (7)	2,021,285		1,945,489
Southwest Wisconsin (5)	356,969		343,583
Waukesha (1)	941,823		906,506
Winding Rivers (7)	754,237		725,954
Winnefox (5)	870,348		837,711
Wisconsin Valley (7)	<u>837,003</u>		<u>805,616</u>
Total	\$14,749,800		\$14,196,700

\*The appropriation factor is the sum of 1.0 and the percent change, expressed as a decimal, in the total appropriation between 2001-02 and 2002-03.

Until 1992-93, the amount appropriated for library system aids was targeted, by statute, at 13% of the total operating expenditures from local and county sources for public library services in the preceding year. However, because the actual percentage repeatedly fell below the 13% target, the 1993-95 budget repealed the target.

However, under 1997 Act 150, DPI is required to include in its biennial budget submission a request for funding equal to 13% of the total operating expenditures from local and county sources in the calendar year immediately preceding the calendar year for which aid would be paid. The Department's 2003-05 biennial budget request includes a request for funding equal to 13% of total operating expenditures, which would represent an increase of \$7,393,400 GPR in 2003-04 and \$8,041,100 GPR in 2004-05 over base funding of \$14,196,700 GPR in 2002-03. The Governor makes the final decisions on what agency budget

requests are included in the executive budget bill introduced for consideration by the Legislature.

Table 4 indicates the level of state aid for public library systems between 1992-93 and 2002-03.

**Table 4: Public Library System Aid**

Fiscal Year	Aid to Public Library Systems	Percent Change Over Prior Year
1992-93	11,072,200	2.9%
1993-94	11,538,200	4.2
1994-95	11,772,200	2.0
1995-96	11,772,200	0.0
1996-97	11,772,200	0.0
1997-98	12,863,800	9.3
1998-99	13,249,800	3.0
1999-00	13,749,800	3.8
2000-01	14,749,800	7.3
2001-02	14,749,800	0.0
2002-03	14,196,700	-3.8

## APPENDIX 2

### Aid Calculation Once State Funding Equals at Least 11.25% of Operation Expenditures

#### Sample Aid Calculation

Beginning in the fiscal year in which the total state aid appropriation equals at least 11.25% of the total operating expenditures for public libraries from local and county sources in the previous calendar year, the state aid formula for public libraries changes. The following sample calculation uses hypothetical data to calculate an example of the aid for System A.

- A. Determine System A's percentage of total state population ( $120,000 / 5,364,000 = 2.2371\%$ )
- B. Multiply the total public libraries appropriation by 0.85 ( $\$16,000,000 \times 0.85 = \$13,600,000$ )
- C. Multiply the results of A and B ( $0.022371 \times \$13,600,000 = \$304,246$ )
- D. Determine System A's percentage of total state geographical area ( $800 / 54,314 = 1.4729\%$ )
- E. Multiply the total public libraries appropriation by 0.075 ( $\$16,000,000 \times 0.075 = \$1,200,000$ )
- F. Multiply the results of E and D ( $\$1,200,000 \times 0.014729 = \$17,675$ )
- G. Determine System A's percentage of statewide shared revenue ( $\$35,000,000 / \$1,039,700,000 = 3.3664\%$ )
- H. Multiply the results of G and E ( $\$1,200,000 \times 0.033664 = \$40,397$ )
- I. Sum the results of C, F, and H to determine System A's total state aid ( $\$304,246 + \$17,675 + \$40,397 = \$362,318$ )

Therefore, Library System A would have received \$362,318 in state aid had this formula been in place after the total state aid appropriation had been at least 11.25% of operating expenditures in a prior year.
